Jeyber Adrián Gómez García

FULL-STACK & CLOUD DEVELOPER | PYTHON • ANGULAR • AWS • SQL

gomezjeyber@gmail.com (+57) 312 5210895 www.linkedin.com/in/jeyber-adrian-gomez-g

Full-Stack Developer with over **2 years** of experience designing and building scalable web applications using **Python, Node.js, Angular, React and AWS**. Experienced in API development, serverless architectures, deployment automation through CI/CD, and Artificial Intelligence-based solutions for enterprise and financial environments. I have participated in building RAG platforms, conversational AI agents and cloud service integrations, focusing on software quality, operational efficiency and business value generation

EXPERIENCE

Junior Full-Stack Developer | Freelance

2024– 2025 | Remote

- Built and deployed full-stack web applications using Python, React, Angular, Express and MongoDB.
- Integrated third-party APIs (Google Maps, payment gateways) to ensure seamless communication.
- Used Docker for containerized deployments and implemented CI/CD pipelines using GitHub Actions.
- Focused on code reusability, clean architecture and agile collaboration with clients.

Full-Stack Developer

2025– 2026 | Remote

- Built and exposed REST APIs to integrate internal systems, third-party platforms and enterprise services, ensuring security and high performance.
- Developed a RAG (Retrieval-Augmented Generation) platform for enterprises, enabling intelligent queries over corporate knowledge bases using generative AI models.
- Transformed a static menu-based chatbot into an AI-powered conversational agent capable of understanding natural language and escalating complex queries to human advisors when needed.
- Implemented continuous integration and deployment (CI/CD) pipelines using GitHub Actions and AWS, automating testing and deployments to improve delivery speed and reliability.

EDUCATION

Mechatronic Engineer October 2021
University of Pamplona

Cs50's web programming with Python and JavaScript December 2024
HarvardX

General English and Cambridge C1 Advanced Preparation March 2024
Universal English College

SKILLS

• Python	• Ruby	• Git	• SQL/NoSQL	• Node.js
• Angular	• React.js	• Continuous Learning	• TypeScript	• JavaScript
